DR. WYNN'S SURE FIRE METHOD TO GET RID OF SCABIES

1. Elimite

1. Apply to cool dry skin (Not after a hot soapy bath).
2. Apply sparingly but thoroughly from chin to toes with special attention to the hands, feet, web spaces, beneath the fingernails, and where skin contacts skin.
3. WASH OFF IN SIX HOURS
4. Treat all members of household and other close contacts.
5. One application is almost always curative.
6. In small infants cover areas of application to prevent sucking and ingestion.

OR-2. Crotamiton (Eurax)

1. After showers or bath, rub into skin from chin down and may wash off in 24 hours and repeat application. Do this for a total of 4 days.
2. Treat all members of household and other contacts.

IN BOTH:

1. Wash all clothes and bed linens in hot water or iron them.
2. Stuffed animals and pillows should be put away for one week (the mites will die in one week off humans).
